

Price map now available on liligo for iPhone: find destinations to match your budget!

You want to take a break from Manchester in October but only have £200 to spend. It's definitely possible, but where to go?

We don't always have a destination in mind when a bout of wanderlust hits. Knowing how important a budget can be, liligo.com has added a new tool to its iPhone application: the **Price Map**.

On top of being able to search for flights, hotels and car hires in real-time now you can search for return trips according to your budget! Choose your departure month and city and we'll show you your travel possibilities on a map.

More specifically, the price map on the [liligo for iPhone](#) app:

- Shows the best prices according to a selected departure month and city
- Allows you to refine your search according to budget, maximum journey time and preferred climate
- Features an adjustable map: full-screen and landscape view

About liligo.com:

[liligo.com](#) is the first specialised search engine in the European travel industry. liligo.com searches 250 sites (travel agencies, airlines including all the low costs, tour operators and European rail companies...) for travel offers and allows fast and easy access to all available online offers, selected and presented without any favourites. Exhaustive and objective, liligo.com is neither a travel agency nor a tour operator. It's mission is to help web users find trips in the simplest and easiest way possible. With more than 2 million unique visitors each month, liligo.com is now available in 10 different domains (France, Germany, Spain, Italy, United Kingdom, Belgium, Switzerland, Romania, Hungary and Austria). liligo.com is a product of Findworks Technologies, a young and innovative start-up founded by Pierre Bonelli in 2005 and currently employs a staff of 35.
