liligo.com: the leading search engine solution used by 7 French airports

liligo.com has just signed a partnership with Strasbourg airport. To date, 7 main French airports have chosen liligo solution, making liligo.com the leading provider to power their websites with its innovative state of the art flights, hotels and car hire white label search engine product.

liligo.com search engine white-label solution is comprehensive and unbiased. These core values are essential to airports websites as is also the ability to withstand very important search volumes. For these reasons, several French airports, representing 22.3% of passengers' traffic in France, chose liligo.com's "tailor-made" approach.

Marseille Provence Airport, France's 3rd largest regional airport for passenger traffic* with more than 8 million passengers and 108 direct destinations, has been using liligo.com's white-label solution since 2008.

The airport is Routes Europe 2014 host and liligo.com is sponsoring the event.

Toulouse - Blagnac Airport, France's 4th largest regional airport, with 7.5 million passengers in 2013*, hundreds of direct destinations and growing traffic, has also chosen liligo.com's white-label solution. Toulouse - Blagnac Airport is connected to all of Europe's major hubs.

"Toulouse-Blagnac Airport has chosen liligo.com to help our passengers find the best travel solutions from Toulouse, whether they are looking for flights, holidays or hotels," comments Jean-Michel Vernhes, Head of the Airport's Board of Directors. "With liligo.com, our passengers can compare the best travel offers and filter their searches by timetables, departure times, airlines, etc. The project was very easy to execute, thanks to liligo's flexible technology and their knowledgeable staff. Thanks to liligo, we designed exclusive features for our online visitors such as an inspiration search engine showing flights available from Toulouse or an interactive map with direct flights and their prices. We hope to offer more new services in 2014, such as a mobile version of our travel search engine."

Montpellier, Clermont-Ferrand, Rennes and Limoges Airports are also collaborating with liligo.com.

In February 2014, Strasbourg Airport has been the latest to adopt liligo.com's technology.

"We are proud to have been repeatedly chosen by so many airports through rigorous public market tenders," says Guillaume Bril, Sales Director at liligo.com. "Today, airports websites are trusted by passengers and need to display comprehensive and unbiased information on their websites. They are also committed to promoting non-stop flights available from their terminals. liligo.com is the only provider that can deliver a specific and flexible service to meet those goals. We are delighted that our know-how is recognized by more and more airports."

liligo.com searches through over 350 travel providers worldwide (legacy and low cost airlines included). Many other travel websites like Lonely Planet or Routard are using liligo.com's technology.
